

## Content Types

### Video Lecture

The platform offers the upload, viewing and download of video presentations through the Video Lecture content type. Recordings of lectures, webinars, or other supplemental videos can be provided to learners using this content type.

File Types supported: .mov, .mp4 (300MB limit)

## Power Point Lecture

The platform offers the upload, viewing and download of Power Point presentations through the Power Point Lecture content type. These can be used for a variety of purposes, such as conveying longer lecture materials or supplementing Video presentations.

File Types supported: .pptx, .ppt

What is Blockchain?

## Blockchain Origins

**Where Did Blockchain Originate?**

**1991**

The technology for blockchain was first introduced in 1991 by Stuart Haber and W. Scott Stornetta. These two mathematicians wanted to implement a system in which document time stamps were not able to be tampered with.

**Late 1990s**

In the late 1990s, securing digital payment systems via a blockchain was proposed by cypherpunk Nick Szabo, known as bit gold. This was never implemented.

**2009**

Bitcoin's pseudonymous creator, Satoshi Nakamoto, introduced the digital currency in a research paper in 2009. He referred to Bitcoin as "a new electronic cash system that's fully peer-to-peer, with no trusted third party."

## Text Lecture

Text Lectures enable the upload, viewing and download of PDF documents. Examples of Text Lectures may be Power Point lectures converted to PDF format, study guides, supplemental lecture notes to go along with a video presentation, etc.

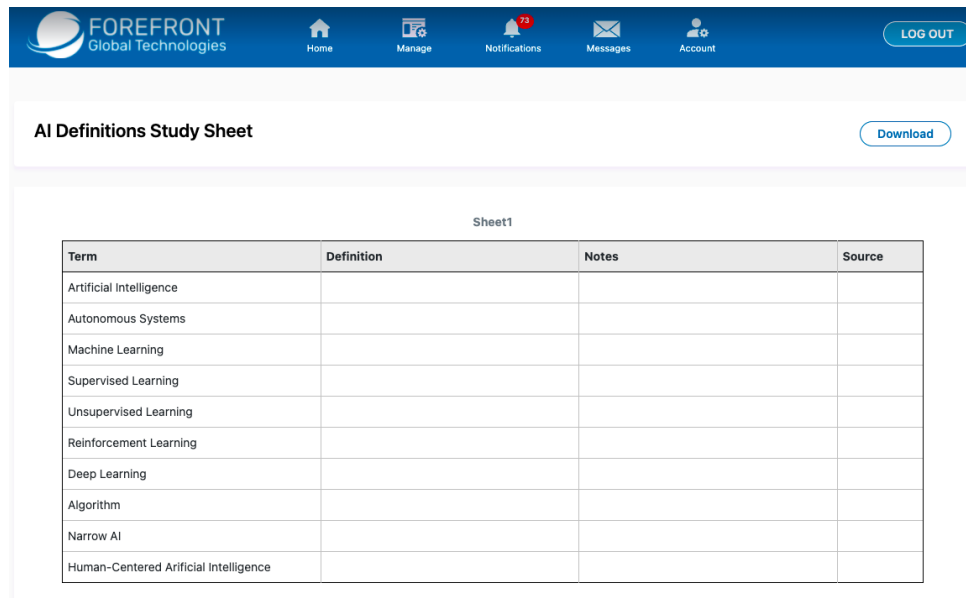

File Types supported: .pdf

## Spreadsheet

The Spreadsheet content type allows the upload, viewing and download of spreadsheet files. When you upload a spreadsheet file as the content, it will display in a table format for the learner to view.

File Types supported: .xls, .xlsx, .ods, .csv, .tsv

The screenshot shows the Forefront Global Technologies user interface. At the top is a blue navigation bar with the logo and icons for Home, Manage, Notifications (with a red badge showing '23'), Messages, and Account. A 'LOG OUT' button is on the right. Below the navigation bar, the main content area displays 'AI Definitions Study Sheet' with a 'Download' button. The spreadsheet itself is titled 'Sheet1' and contains a table with 4 columns: Term, Definition, Notes, and Source. The table lists various AI-related terms.

Term	Definition	Notes	Source
Artificial Intelligence			
Autonomous Systems			
Machine Learning			
Supervised Learning			
Unsupervised Learning			
Reinforcement Learning			
Deep Learning			
Algorithm			
Narrow AI			
Human-Centered Artificial Intelligence			

## Video Live Streaming

This content type allows instructors to schedule and conduct Livestream events for their learners. These events include a live chat that allows for a connected experience and an optional dial-in for users who cannot join via the browser.

The learning environment automatically records each Livestream, so upon event completion, these Livestreams are available on the course journey for all users and can be viewed after the Livestream event.

File Types supported: .jpg, .jpeg, .png, .pdf

Note: The file you upload for the live stream will serve solely as the banner for the live stream when the stream is not active.

## Embedded Content

This content type allows you to embed videos and links from other sources, like YouTube or other websites, so that learners can interact with them directly from within the learning environment.

Rather than attaching a video file, you can go directly to an external site, copy the embed code, and paste it directly into the learning environment Content Upload page.

No file upload is needed for this content type.
